Current professional activities include comprehensive psychological evaluations/assessments, psychotherapy and consultation with children, adolescents, adults and families from diverse backgrounds. Clients are referred by physicians, psychiatrists, schools, the Court and attorneys. Collaborate with other mental health professionals to address specific concerns regarding diagnosis and treatment planning. Psychological evaluations provide diagnostic clarification, intervention recommendations and treatment planning. Psychotherapy services and educational seminars are provided to parents and children to inform and treat various diagnoses. Consultation services are offered to independent schools, physicians and the Court.
